SMART LIGHTING –
THE CLEVER WAY TO
BOOST YOUR SALES

An ever increasing number of people are becoming excited about the fascinating opportunities offered by intelligent networked lighting. We have completely revised and massively expanded our SMART⁺ portfolio to allow you to exploit this fast-growing potential in the best way possible. You can look forward to a multitude of new impulses for your lighting business!

THE NEW SMART$^+$ PORTFOLIO OF LAMPS AND LUMINAIRES: HUGE RANGE FOR INDOORS AND OUTDOORS

Whether you're interested in highly efficient LED lamps or stylish LED luminaires, products for indoor or outdoor use, or control via app, voice or smart remote – the SMART$^+$ product portfolio is broader and more extensive than ever before.
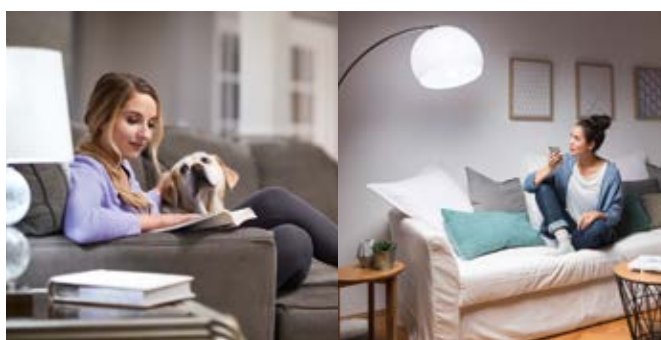

SMART SOLUTIONS FOR ALL CUSTOMER NEEDS

Whether its convenience, a sense of security, the ability to take advantage of a range of intelligent functions or the pleasure gained from configuring lighting indoors and outdoors – customers have widely differing expectations of smart lighting. SMART$^+$ fulfills all these expectations in the best way possible.

1. Clever & convenient

Why stand up every time you want to switch the lighting on or off? SMART$^+$ customers can control their lighting via app or voice from the comfort of their sofa.

2. Clever & mobile

SMART$^+$ gives many users an enhanced sense of security. They can control their lighting at home from practically any location – to simulate their physical presence, for example.

WHY CUSTOMERS ARE SO EXCITED ABOUT SMART$^+$
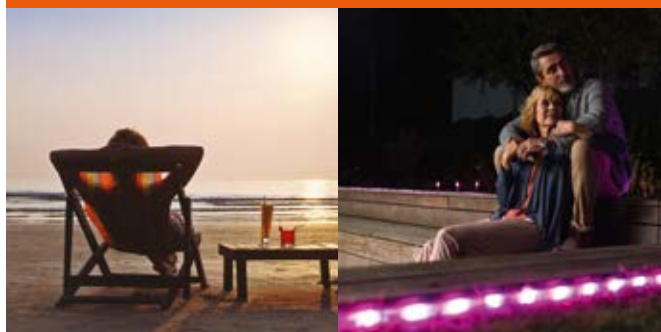

3. Clever & appealing

Lighting is now much more than simply a matter of "on" or "off". More and more customers are becoming excited by the possibility of creating atmospheric lighting scenarios or automating their desired lighting sequences (e.g. wake-up light) throughout the course of the day.

4. Clever & outdoors

Greater convenience, increased security, heightened atmosphere: Outdoors too, LEDVANCE has a large number of smart lighting products that open up a wide range of fascinating possibilities.

THREE PRODUCT LINES – THREE CONTROL METHODS

Some people want to control their lighting with their smartphone. Others prefer the convenience of using smart speakers and voice commands. A third group would like to integrate their smart lighting into a comprehensive smart home system via a gateway.

That's why we now offer your customers three product lines based around different technologies – each with its own recommended control method. The individual lines are tailored perfectly to the control method we recommend for them. But alternative control methods are available for each line to ensure customers retain flexibility moving forward.

SMART HOME COMFORT – LIGHT CONTROL VIA SMARTPHONE:

The SMART$^+$ WIFI products can be controlled simply and conveniently via a WiFi router using the LEDVANCE SMART$^+$ WIFI app. More on pg. 8.

SMART⁺ WIFI: SMART LIGHTING AT THE TOUCH OF A FINGER

LIGHT CONTROL VIA SMARTPHONE: SMART⁺ WIFI

SMART⁺ WiFi is the simplest route to smart lighting. Your customers only need the following: a SMART⁺ WiFi lamp or luminaire, a router (that most homes have already), the free LEDVANCE SMART⁺ WiFi app – and they're ready to go!

The control method we recommend in this case is the smartphone respectively the LEDVANCE SMART⁺ WIFI app. The possibilities are practically endless, with the app enabling control of a wide range of functions in an extremely simple manner. What's more, there's a huge portfolio of lamps and luminaires for customers to choose from – for indoor and outdoor areas.

The key benefits at a glance:
— Recommended control method is the LEDVANCE SMART⁺ WiFi app
— Huge range of lamps and luminaires
— Up to 250 products can connected up, and around 50 can be controlled simultaneously
— Short response time

Home needs an internet (WiFi) connection

SMART⁺ WIFI CAN DO ALL OF THIS

PRODUCT FUNCTIONS*:

* Depending on product model

ON OFF — On/Off function

**DIM** — Dimming function

WARM COOL — From warm white to cool white

COLOR — Light color function

SYSTEM FUNCTIONS:

Group light sources
For example, selected light sources in living room, combination of indoor and outdoor light sources

Create lighting scenes
All selected light sources are adjusted to create the desired atmosphere – at the touch of a button

Light management while on the go
Controlling the lighting at home from any location – e.g. simulating physical presence at home while away on a business trip

Interacting light sources
Combining several products and functions – e.g. living room lighting off, bedroom lighting on

Automated lighting sequences
Light for waking up and falling to sleep, weather-dependent lighting, light that supports the human biorhythm, and much more besides

VOICE CONTROL USING WIFI

The SMART⁺ WiFi app can also be integrated into other apps – such as the apps from Google Home or Amazon Alexa, enabling voice control via speaker.

SMART⁺ WIFI APP: MUCH MORE

Unsurprisingly, SMART⁺ WiFi can be used to control simple functions such as dimming, light temperature or light color. But this intuitive system also can do a whole lot more. Just a few examples ...

LIGHTING FOR A WIDE RANGE OF MOODS

Cool white light when working, particularly cozy lighting for evenings on the sofa, whimsically colorful lighting for parties ... SMART⁺ WIFI enables simple creation of even complex lighting scenarios. The app already contains a few pre-configured scenarios.
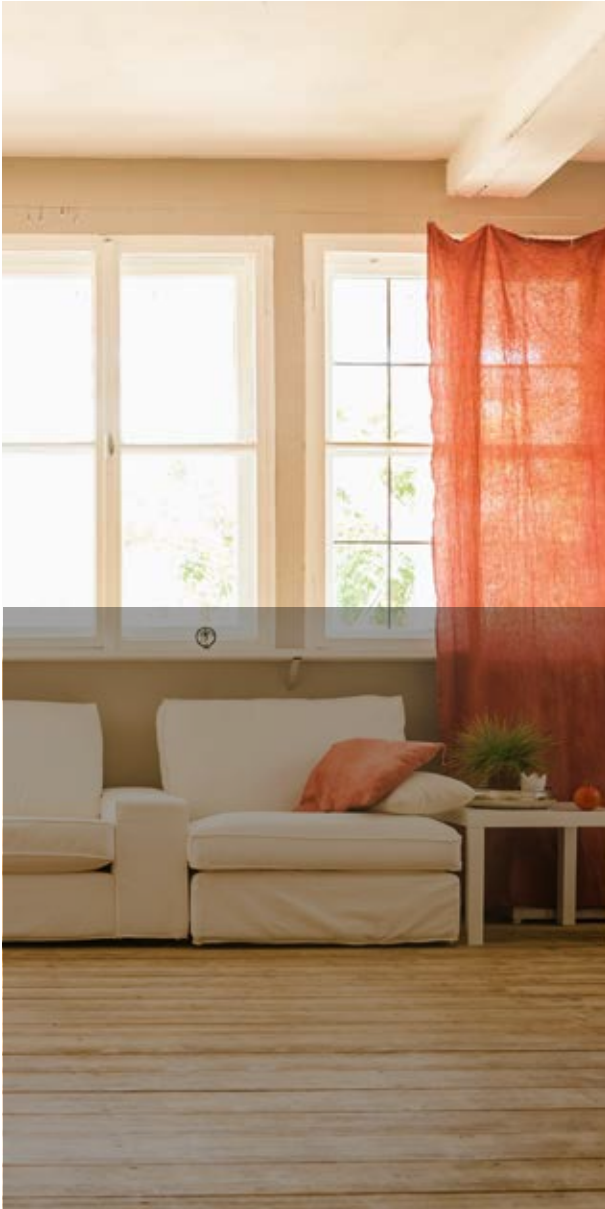

LIGHTING THAT ENHANCES WELL-BEING

SMART⁺ WIFI can adjust lighting to meet our changing needs over the course of the day ("circadian rhythm"). Bright and stimulating in the morning, for example, and a dimmed warm white during periods of relaxation. Eight default settings have already been programmed in the app.

THAN JUST "ON" OR "OFF"

LIGHTING THAT REACTS TO THE WEATHER

SMART+ WIFI is even able to respond to the data in the current weather report: no lighting during bright sunshine, for example, and automatic lighting activation when the sun goes down.

LIGHTING FOR WAKING UP AND FALLING TO SLEEP

The lighting slowly becomes brighter in the morning (fade-in function) – and the intensity gradually decreases again (fade-out) when it's time to go to sleep. The respective times can be defined by the customer, and repeated for any number of desired days.
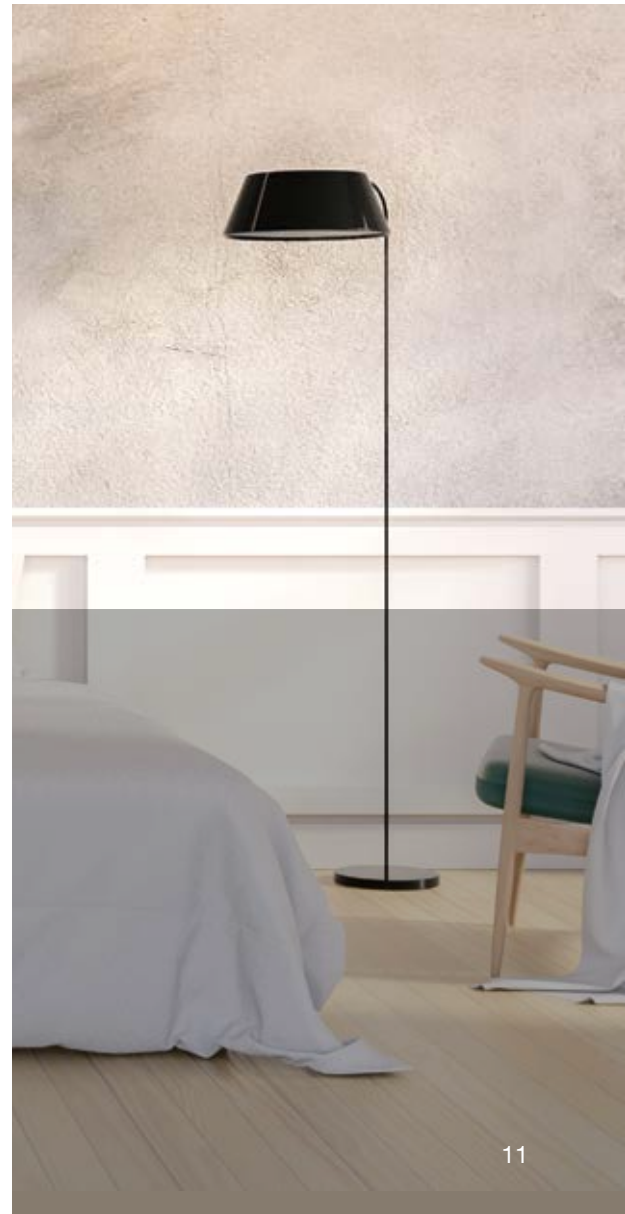

LEDVANCE SMART⁺ AND GOOGLE NEST – PERFECTLY COMPLEMENTING ONE ANOTHER

LIGHT CONTROL VIA VOICE COMMAND: SMART⁺ BLUETOOTH

SMART⁺ Bluetooth is our recommendation for anyone who wants to conveniently control their lighting by voice. This is because the products harmonize perfectly with the smart speakers from Google.

The key benefits at a glance:
— Direct integration of SMART⁺ Bluetooth products in the Google Home app thanks to Seamless Setup
— Fast installation: less than 5 minutes
— Extremely fast response time
— Bluetooth Mesh function: each additional SMART⁺ Bluetooth lamp connected in series increases the range of the network
— A practically unlimited number of lighting sources can be connected up

Bluetooth® MESH

The smart light switch. With Google.

GOOGLE HOME APP

LEDVANCE LAMP/LUMINAIRE

GOOGLE NEST MINI

Nest Mini requires WiFi, a nearby electrical socket, a compatible smartphone or tablet, and a Google account.

SMART⁺ BLUETOOTH CAN DO ALL OF THIS

**PRODUCT
FUNCTIONS[1]:**

[1] Depending on product model

ON OFF — On/Off function

DIM — Dimming function

WARM COOL — From warm white to cool white

COLOR — Light color function

**SYSTEM
FUNCTIONS:**

Voice control
Convenient voice control via smart speakers

Group lighting sources
For example, selected light sources in the living room, all light sources in the out-door area

Create lighting scenes
Create lighting scenes using the Google Home app and activate the desired atmosphere via speaker

Light management while on the go
Controlling the lighting at home from any location – e.g. simulating physical presence while away on a business trip

Program times
For example, define gently intensifying lighting levels at waking-up time and gently fading light when going to sleep

Further options:
weather information, control of music and audio, scheduling, heating, blinds and a whole lot more[3].
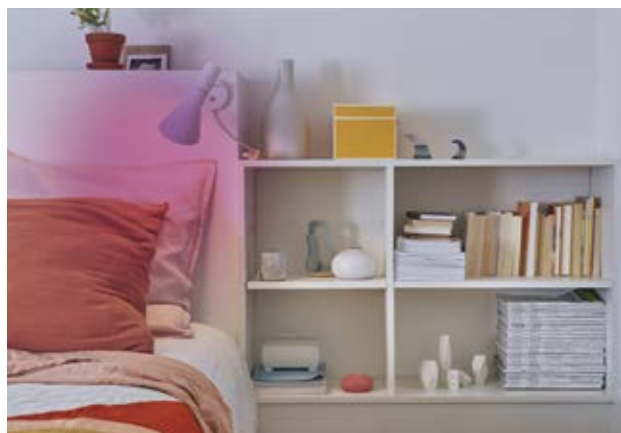

A PERFECT COMBINATION: STARTER KIT WITH SMART⁺ PRODUCT AND GOOGLE NEST MINI[2]

Nest Mini available in the colors Chalk and Charcoal

[2] Currently available in DACH region, other countries on request
[3] Compatible smart home devices are required

GOOGLE NEST MINI SPEAKER AND GOOGLE ASSISTANT – SUPPORT FOR YOUR HOME

Conveniently manage your lighting using voice control. But the Google Nest Mini speaker can also do a whole lot more ...

IT COULDN'T BE EASIER: STREAMING MUSIC VIA VOICE COMMANDS
You can play your favorite music from YouTube Music, Spotify or other providers using voice commands.[1] Just tell Google Assistant which song, artist, album or genre you want to listen to. Or stream music directly from your smartphone[2] to Nest Mini.[3]

ALWAYS AT YOUR DISPOSAL: YOUR GOOGLE ASSISTANT
Google Assistant is there for you wherever and whenever you need it:[4] Ask it, for example, about the weather or the latest news. You will get an immediate answer. You can also use voice commands to set timers and alarms.

"HEY GOOGLE, GOOD MORNING"
Google Assistant[4] identifies you by your voice: Thanks to Voice Match, everyone in your home can retrieve their own appointments, reminders or traffic information.[5]

TURN UP THE MUSIC
Nest Mini delivers clear sound thanks to enhanced power and bass.[3]

YOUR SMART HOME OBEYS YOUR EVERY WORD
Google Assistant[4] is just a voice command away: Want to dim the light, turn up the heating or switch the TV on? Your voice is the only thing you need.[6] Nest Mini is compatible with hundreds of smart home devices such as lamps, sockets and TVs, from a range of brands.

Hey Google, turn on the light

Hey Google, switch the light to red

Hey Google, switch the light to 50 %

Hey Google, play some music

Hey Google, what is 25 times 83?

Hey Google, set the timer for 15 minutes

[1] Access to some content requires a subscription. Additional terms of use and/or additional fees may apply.
[2] Requires an Android smartphone or Chromecast-compatible apps on iOS.
[3] Nest Mini requires WiFi, a nearby electrical socket, a compatible smartphone or tablet, and a Google account.
[4] A compatible smartphone or tablet (Android, iOS) and an internet connection are required to use the Assistant.

[5] Some additional setups and registrations are needed for Voice Match. Voice Match can identify up to six users. When using Voice Match, it is possible that Google will identify you incorrectly if another user has a similar voice or uses a recording of your voice.
[6] Compatible smart home devices are required.

OTHER CONTROL METHODS FOR SMART⁺ BLUETOOTH

SMART⁺ BLUETOOTH AND THE LEDVANCE SMART⁺ APP FOR BLUETOOTH (ANDROID AND IOS)

The LEDVANCE SMART⁺ app for Bluetooth is indispensable particularly in cases where there's a requirement to integrate older Bluetooth products (e.g. OSRAM). Simply select the desired firmware on the startup screen using the flash function: LEDVANCE SMART⁺ app, Google Assistant, Amazon Alexa or Apple HomeKit. Or just simply control things directly via the LEDVANCE SMART⁺ app.

LEDVANCE SMART⁺ App

SMART LIGHT
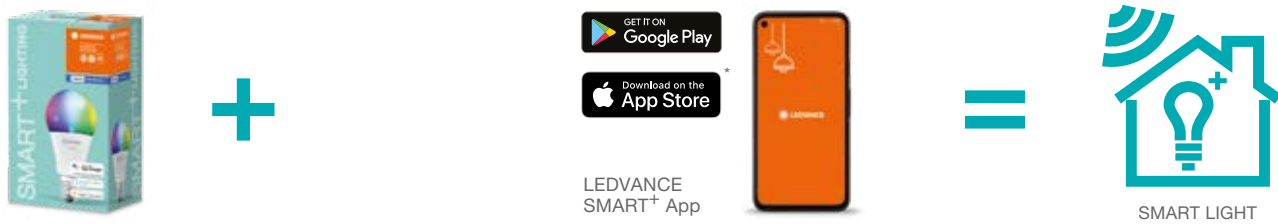

SMART⁺ BLUETOOTH AND AMAZON ALEXA (ANDROID AND IOS)

You'd like to control LEDVANCE SMART⁺ Bluetooth products through Amazon Alexa? Simply download the LEDVANCE SMART⁺ app for Bluetooth, select "Amazon Alexa" in the start menu and carry out the firmware update for selected products: Now you directly integrate the Bluetooth products into the Alexa app and enjoy voice command.

Amazon Echo speaker plus Amazon Alexa app

SMART LIGHT

SMART⁺ BLUETOOTH AND APPLE HOMEKIT (IOS)

The Apple Home app comes pre-installed on all Apple devices. It enables control by voice or finger gestures. Voice commands can be issued via the Siri voice assistant or the Apple HomePod. When Apple TV is used, control is also possible regardless of the user's physical location.

Apple Home App

Apple HomeKit can be additionally voice controlled via the Apple HomePod

SMART LIGHT

SMART⁺ ZIGBEE: SYSTEM SOLUTIONS FOR SMART LIGHTING

LIGHT CONTROL VIA GATEWAY: SMART⁺ ZIGBEE

The SMART⁺ products using Zigbee technology were developed specifically for control via a gateway. This makes them the ideal solution for anyone who wants to fully exploit the possibilities of smart lighting and wishes to integrate smart light into a comprehensive smart home system.

The key benefits at a glance:
— Recommended control method is the app belonging to the partner system (alternatively, control via a smart speaker or a smart remote)
— Large range of lamps and luminaires
— Up to 50 products can be connected up

— Compatibility with the following systems: Bosch, Philips Hue, Deutsche Telekom Qivicon, SAMSUNG SmartThings, Schwaiger HOME4YOU and many more

LEDVANCE LAMP/LUMINAIRE

GATEWAY WITH PARTNER APP

PRODUCT FUNCTIONS*:

* Depending on product model

ON OFF — On/Off function

DIM — Dimming function

WARM COOL — From warm white to cool white

COLOR — Light color function

SYSTEM FUNCTIONS:

Voice control
Convenient voice control via smart speakers is also possible

Group lighting sources
For example, selected light sources in the living room, all light sources in the outside area, etc.

Create lighting scenes
All selected light sources are adjusted to create the desired atmosphere – with just a single command

Program times
For example, gently intensifying lighting levels at waking-up time and fading lighting levels when going to sleep

Light management while on the go
Controlling the lighting at home from any location – e.g. simulating physical presence while away on a business trip.

Further smart applications
In addition to the lighting, you can also control heating, blinds, alarm systems, fire and water leak detectors, infotainment, household appliances and many more applications in a smart and convenient manner.

Fire alarm during absence:
Smoke alarms can also be integrated into a gateway system. (See also: Bosch & LEDVANCE Starter Kits, pg. 18)

Measures to simulate physical presence (involving lighting, blinds, radio, etc.) combine with alarm and warning functions to create a comprehensive security concept. (See also: Bosch & LEDVANCE Starter Kits, pg. 18)

FOR ENTRY-LEVEL USERS: THE SIMPLE ALTERNATIVE WITHOUT GATEWAY AND APP

The SMART⁺ Zigbee products can also be used together with the SWITCH or SWITCH MINI smart remotes – extremely easily, without app, gateway and internet connection. The remotes can be directly coupled with the Zigbee products.

LEDVANCE & BOSCH: A FANTASTIC COMBINATION

SMART⁺ ZIGBEE AND THE BOSCH HOME SYSTEM

Bosch Smart Home brings greater security for your home and more convenience in your everyday life. Possible applications for the system, among many others, are convenient and energy-saving management of heat and air quality, and implementation of alarm systems to protect against fires and intruders. Responsible for lighting applications: the LEDVANCE SMART⁺ Zigbee products!
